

## YOUR SOURCE FOR NATIVE AND CONSERVATION GRADE PLANTS

The North Yakima Conservation District (NYCD) has two major plant sales per year.

Spring Sale (March) – Bare-root plants are pre-ordered by customers on a first-come, first serve basis. Orders are placed by returning an order form via fax (509) 454-5682 or mail, or by phoning the order in (509) 454-5736 Ext 5. Interested individuals should contact the NYCD to be on our brochure mailing list which is usually mailed in February.

Fall Sale (September) – Potted plants are sold in a one-day, open-house, clearance manner in late September. Most advertisement is through our mailing list. Occasionally, an advertisement is made via newspaper or radio.

A combination of deciduous and evergreen trees, shrubs, and wildflowers are made available. The majority of species are native to our area, although a few are non-native species which serve the primary function of windbreak.

Many conservation benefits are derived from the vegetation.

- Soil stabilization
- Shade, cover, habitat
- Wildlife food source
- Wind and energy reduction
- A source of clean oxygen
- Beauty and aesthetics
